

# DATABASE SCHEMA DIAGRAM

task_runs	
id	bigint
created_at	time
updated_at	time
start_time	time
end_time	time
runtime	bigint
files_added	text[]
files_deleted	text[]
magic_string_hits	bigint
status	varchar
deleted_at	time

## Explanation:

id: Primary key to uniquely identify each record(GORM provides it by default)

created\_at: Automatic timestamp indicating when the record was created. (GORM provides it by default)

updated\_at: Automatic timestamp indicating when the record was last updated. (GORM provides it by default)

deleted\_at: Automatic timestamp indicating when the record was last deleted. (GORM provides it by default)

start\_time: Time when the task run started.

end\_time: Time when the task run ended.

runtime: Duration of the task run.

files\_added: List of files added during the task run.

files\_deleted: List of files deleted during the task run.

magic\_string\_hits: Number of times the magic string was found.

status: Current status of the task run (e.g., "in progress," "success").
